1. IDENTIFICATION

Product Name
Nuon Lithium Manganese Dioxide (Coin)

Other means of identification
SDS # GLI-001

Synonyms
Lithium (CR) Primary Battery (non-rechargeable).

Recommended use of the chemical and restrictions on use
Recommended Use Battery.

Details of the supplier of the safety data sheet
Distributor GlobTek, Inc.
186 Veterans Drive, Northvale, NJ 07647 USA +1-201-784-1000

Emergency Telephone Number
Emergency Telephone (24 hr) INFOTRAC 1-352-323-3500 (International)
1-800-535-5053 (North America)

2. HAZARDS IDENTIFICATION

Emergency Overview Safety Data Sheets (SDS) are a sub-requirement of the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard, 29 CFR Subpart 1910.1200. This Hazard Communication Standard does not apply to various subcategories including anything defined by OSHA as an "article". OSHA has defined "article" as a manufactured item other than a fluid or particle; (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees. Because all of our batteries are defined as "articles", they are exempt from the requirements of the Hazard Communication Standard, hence an SDS is not required. However, this Safety Data Sheet (SDS) contains valuable information critical to the safe handling and proper use of this product. This SDS should be retained and available for employees and other users of this product.

Appearance Geometric, solid object
Physical state Solid

Classification
The chemicals listed in section 3 are contained in a sealed container. Risk of exposure only occurs if battery is mechanically, thermally, or electrically abused.

Other hazards Harmful to aquatic life with long lasting effects
3. COMPOSITION/INFORMATION ON INGREDIENTS

Synonyms
Lithium (CR) Primary Battery (non-rechargeable).

**If Chemical Name/CAS No is “proprietary” and/or Weight-% is listed as a range, the specific chemical identity and/or percentage of composition has been withheld as a trade secret.**

4. FIRST-AID MEASURES

First Aid Measures

General Advice
The following information applies if the battery is mechanically, thermally, or electrically abused.

Eye Contact
Immediately flush eyes with water for 30 minutes while lifting the upper and lower lids. Get medical attention.

Skin Contact
Flush affected area with lukewarm water for at least 30 minutes. If skin irritation persists, call a physician.

Inhalation
If symptoms are experienced, remove source of contamination or move victim to fresh air. Get medical attention.

Ingestion
Do not induce vomiting. Call a physician or Poison Control Center. National battery ingestion hotline: 202-625-3333.

Most important symptoms and effects

Symptoms
May cause irritation to the eyes, skin, gastrointestinal, and respiratory systems. A shorted lithium battery can cause thermal and chemical burns upon contact with the skin.

Indication of any immediate medical attention and special treatment needed

Notes to Physician
Electrolyte is immobilized and completely secured within battery. If battery is opened, acute and chronic-electrolyte (DME) is slightly to moderately toxic.

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media
For burning battery in bulk quantities of unpacked cells, use Class D extinguishers; Lith-X, Powdered graphite.

Unsuitable Extinguishing Media
Cells may rupture when exposed to excessive heat. This could result in the release of flammable or corrosive materials.

**Hazardous Combustion Products** Carbon monoxide. Carbon dioxide (CO2). Lithium oxides.

**Protective equipment and precautions for firefighters**
As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment and emergency procedures**

**Personal Precautions** Use personal protective equipment as required. Ventilate affected area.

**Other Information** The material contained within the batteries is only expelled under abusive conditions.

**For Emergency Responders** If the battery material is released, remove personnel from the area until fumes dissipate.

**Environmental precautions**

**Environmental precautions** See Section 12 for additional Ecological Information.

**Methods and material for containment and cleaning up**

**Methods for Containment** Prevent further leakage or spillage if safe to do so.

**Methods for Clean-Up** Avoid contact with electrolyte. Wear protective gloves, and place in container filled with oil and wrap tightly in a polyethylene bag. For waste disposal, see section 13 of the SDS.

7. HANDLING AND STORAGE

**Precautions for safe handling**

**Advice on Safe Handling** Do not expose battery or cell to extreme temperatures or fire. Do not disassemble, crush or puncture battery. Avoid mechanical or electrical abuse. Do not short circuit.

**Conditions for safe storage, including any incompatibilities**

**Storage Conditions** Insulate positive and negative terminals to avoid short circuit. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from heat. Protect from direct sunlight. Prevent condensation on cells or battery terminals. Elevated temperatures may result in reduced battery life.

**Incompatible Materials** If leaked, forbidden to contact with strong oxidizers, mineral acids, strong alkalis, halogenated hydrocarbons. Water with internal contents of battery.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Exposure Guidelines**
Manganese dioxide
1313-13-9

TWA: 0.02 mg/m³ Mn respirable fraction
TWA: 0.1 mg/m³ Mn inhalable fraction
(vacated) Ceiling: 5 mg/m³ Mn
Ceiling: 5 mg/m³ Mn
IDLH: 500 mg/m³ Mn
TWA: 1 mg/m³ Mn
STEL: 3 mg/m³ Mn

1,3-Dioxolane
646-06-0

TWA: 20 ppm

Graphite
7782-42-5

TWA: 2 mg/m³ respirable fraction
all forms except graphite fibers
TWA: 15 mg/m³ total dust synthetic
TWA: 5 mg/m³ respirable fraction synthetic
(vacated) TWA: 2.5 mg/m³ respirable dust natural
(vacated) TWA: 10 mg/m³ total dust synthetic
(vacated) TWA: 5 mg/m³ respirable fraction synthetic
TWA: 15 mg/m³ natural respirable dust

Carbon Black
1333-86-4

TWA: 3 mg/m³ inhalable fraction
TWA: 3.5 mg/m³ synthetic
(vacated) TWA: 3.5 mg/m³ TWA: 0.1 mg/m³ Carbon black in presence of Polycyclic aromatic hydrocarbons PAH
IDLH: 1250 mg/m³
TWA: 2.5 mg/m³ natural respirable dust

Appropriate engineering controls

Engineering Controls
Apply technical measures to comply with the occupational exposure limits. Showers. Eyewash stations. Ventilation systems.

Individual protection measures, such as personal protective equipment

Eye/Face Protection
Always wear safety glasses when working with batteries and cells. Refer to 29 CFR 1910.133 for eye and face protection regulations.

Skin and Body Protection
Not necessary under conditions of normal use. In case of battery rupture or leakage, wear rubber apron and Viton rubber gloves, Protective clothing.

Respiratory Protection
Not necessary under conditions of normal use. In case of battery venting or rupture, use a self contained full face respiratory mask.

General Hygiene Considerations
Handle in accordance with good industrial hygiene and safety practice.

9. PHYSICAL AND CHEMICAL PROPERTIES

Kinematic Viscosity: Not determined
Dynamic Viscosity: Not determined
Explosive Properties: Not determined
Oxidizing Properties: Not applicable

10. STABILITY AND REACTIVITY

Reactivity
Not reactive under normal conditions.

Chemical Stability
Stable under recommended storage conditions.

Possibility of Hazardous Reactions
None under normal processing.

Hazardous Polymerization
Hazardous polymerization does not occur.

Conditions to Avoid
Heating, mechanical and electrical abuse. Moisture, recharge, disassembly.

Incompatible Materials
If leaked, forbidden to contact with strong oxidizers, mineral acids, strong alkalis, halogenated hydrocarbons. Water with internal contents of battery.

Hazardous Decomposition Products
None known based on information supplied.

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Product Information
Inhalation, skin contact and eye contact are possible when the battery is opened. The following is based on exposure to internal contents

Eye Contact
Corrosive fumes will be very irritating to eyes.

Skin Contact
Contents of an open battery may be absorbed through the skin causing localized inflammation.

Inhalation
Contents of an open battery can cause respiratory irritation. Inhalation of vapors may cause irritation of the upper respiratory tract and lungs.

Ingestion
Swallowing a battery can be harmful. Contents of an open battery can cause serious chemical burns of the mouth, esophagus, and gastrointestinal tract.

13. DISPOSAL CONSIDERATIONS

Waste Treatment Methods

Disposal of Wastes
Lithium batteries are best disposed as a non-hazardous waste when fully or mostly discharged. The Federal Environmental Protection Agency (EPA) (governed by the Resource Conservation and Recovery Act (RCRA)) do not list or exempt lithium as a hazardous waste. However, if waste lithium batteries are still fully charged or only partially discharged, they can be considered a reactive hazardous waste because of significant amounts of unreacted lithium in the battery. The batteries must be neutralized through an approved secondary treatment facility prior to disposal as a hazardous waste (as required by the U.S. Land Ban Restrictions for the hazardous and Solid Waste Amendments of 1984.) Secondary treatment center receive these batteries as manifested hazardous waste under code"D003-reactive." Use a professional disposal firm for disposal of mass quantities of charged lithium batteries. Consult your local environmental officer. Do not incinerate. Dispose of in accordance with federal, state and local environmental regulations.

Contaminated Packaging
Disposal should be in accordance with applicable regional, national and local laws and regulations.

14. TRANSPORT INFORMATION

Note
Please see current shipping paper for most up to date shipping information, including exemptions and special circumstances.

DOT
Please contact manufacturer for most current information
